

Unit 4 Phase I Source Code Rubric

Course: CMSC 495 6981 Computer Science Capstone (2265)

Criteria	Excellent 25 points	Good 20 points	Fair 15 points	Poor 0 points	Criterion Score
Project Setup	Excellent work in the following criteria: Proper setup of coding tools/IDE Installation of necessary libraries and packages Integration of version control system Organized project structure with separation of configuration files	Good work in the following criteria: Proper setup of coding tools/IDE Installation of necessary libraries and packages Integration of version control system Organized project structure with separation of configuration files	Acceptable work in the following criteria: Proper setup of coding tools/IDE Installation of necessary libraries and packages Integration of version control system Organized project structure with separation of configuration files	Poor work in the following criteria: Proper setup of coding tools/IDE Installation of necessary libraries and packages Integration of version control system Organized project structure with separation of configuration files	/ 25

Criteria	Excellent 25 points	Good 20 points	Fair 15 points	Poor 0 points	Criterion Score
Core function- ality	Excellent work in the following criteria: Implementation of features outlined in project requirements Choice of efficient algorithms Code organized into modular components with minimal code duplication.	Good work in the following criteria: Implementation of features outlined in project requirements Choice of efficient algorithms Code organized into modular components with minimal code duplication.	Acceptable work in the following criteria: Implementation of features outlined in project requirements Choice of efficient algorithms Code organized into modular components with minimal code duplication.	Poor work in the following criteria: Implementation of features outlined in project requirements Choice of efficient algorithms Code organized into modular components with minimal code duplication.	/ 25
Documen- tation	Excellent work in the following criteria: Consistent code formatting Clear and concise comments Documentations of readme file, project dependencies, versions, unit test cases	Good work in the following criteria: Consistent code formatting Clear and concise comments Documentations of readme file, project dependencies, versions, unit test cases	Average work in the following criteria: Consistent code formatting Clear and concise comments Documentations of readme file, project dependencies, versions, unit test cases	Poor work in the following criteria: Consistent code formatting Clear and concise comments Documentations of readme file, project dependencies, versions, unit test cases	/ 25

Criteria	Excellent 25 points	Good 20 points	Fair 15 points	Poor 0 points	Criterion Score
----------	------------------------	-------------------	-------------------	------------------	-----------------

Criteria	Excellent 25 points	Good 20 points	Fair 15 points	Poor 0 points	Criterion Score
Unit Testing	Excellent work in the following criteria: Comprehensive unit tests covering all major functionalities Utilization of appropriate testing frameworks Clear documentation of test cases	Good work in the following criteria: Comprehensive unit tests covering all major functionalities Utilization of appropriate testing frameworks Clear documentation of test cases	Acceptable work in the following criteria: Comprehensive unit tests covering all major functionalities Utilization of appropriate testing frameworks Clear documentation of test cases	Poor work in the following criteria: Comprehensive unit tests covering all major functionalities Utilization of appropriate testing frameworks Clear documentation of test cases	/ 25
